

# System Requirements

Use a supported web browser for optimal performance when you use Paperless Pipeline.

Access Paperless Pipeline using your preferred web browser on your computer, phone, or tablet.

## Introduction

Using a supported web browser is the simplest way to ensure a top-notch experience with Paperless Pipeline. While the system may function in other setups, recommended browsers help you avoid disruptions and unlock its full potential.

## All Devices

You don't need to install any apps to use Paperless Pipeline. It can be accessed from your preferred web browser on various devices like PC, Mac, iOS, Android, and Linux.

No matter where you log in – desktop, laptop, or mobile device – Paperless Pipeline adapts seamlessly to your screen. This ensures you can manage workflows efficiently, whether at the office, home, or on the go.

## Supported Web Browsers

For the best experience, we recommend using one of these web browsers with their latest stable release:

- [Chrome](#)
- [Safari](#)
- [Firefox](#)
- [Edge](#)

Keeping your browser updated ensures optimal compatibility, enhanced security, and access to the latest features. We've optimized Paperless Pipeline to shine on these platforms, giving you a seamless workflow experience.

## Stay Up-to-Date

Keeping your browser and operating system up to date lets you take advantage of new features and enhancements while ensuring better security and device performance.

Need help keeping things up-to-date? Use the links below to update your preferred browser:

- [Update Google Chrome →](#)
- [Update Safari →](#)
- [Update Mozilla Firefox →](#)
- [Update Microsoft Edge →](#)
