

What's New (July 12, 2020)

New Home page steers you where you need to go: Pipeline's new *Home* page now includes information that will allow you to quickly determine which area needs your greatest attention. Expandable areas allow you to view details that are critical for you to know each time you login to Pipeline.

Company-wide announcements: Pipeline's new announcement feature allows you to post an announcement to be displayed on the *Home* page to all the users in your account. The reader can hide the announcement once it has been read, and it will re-appear if the message is updated. Master admins can update the message from the [Company Settings] page.

Track incoming emails sent to transactions: Quickly identify which transactions have received email messages during your specified time period using the new *Email Received* search option.

Save the search as a custom shortcut for regular, easy access from your *Home* page and *Transactions* page left menus.
